

2 Key Use Cases in the hospital

Bedside

'In-patients'

- Usually fixed mounting on an arm
- Devices often still owned by the hospital

Ambulatory

'Out-patients'

- BYOD in combination with mobile tablets.
- Tablets to be rented and centrally charged

Common

- HL7 connection with HIS for admission / transfer / discharge
- Personalized patient experience based on patient groups
- Automated removal of personal information
- On-premise or (private) cloud solution
- Minimum deployment of staff required
- Possibility to use different types of devices
- Combination of BYOD, location-bound central devices, and mobile (rental) solutions
